

BHUMIKA MISHRA

Cybersecurity Analyst | SOC Analyst L1 | VAPT | Web Security

India | +91-6355915116 | mishrabhumi43@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Cybersecurity fresher with a BE in Computer Engineering and hands-on training in SOC fundamentals, vulnerability assessment, web application security, network security, and security testing. Practical experience with Burp Suite, Nmap, Wireshark, Splunk fundamentals, SQLMap, Nessus, Kali Linux, and Python through security labs, projects, and structured training. Seeking entry-level opportunities as a SOC Analyst L1, Cybersecurity Analyst, VAPT Analyst, or Security pentation Trainee.

TECHNICAL SKILLS

VAPT & AppSec	OWASP Top 10, Vulnerability Assessment, Web Application Testing, SQL Injection, XSS, Authentication Testing, Reconnaissance, Enumeration, SSRF, XXE, Business logic vulnerability, WebSockets Security, HTTP Request Smuggling, DOM XSS, Authentication Testing. ...
SOC & Monitoring	SIEM Fundamentals, Log Analysis, Threat Detection, Incident Analysis, Security Monitoring, MITRE ATT&CK Basics
Networking	TCP/IP, DNS, DHCP, HTTP/HTTPS, Network Scanning, Packet Analysis, Subnetting, VLANs & Trunking, Access Control Lists
Security Tools	Burp Suite, SQLMap, Nmap, Nessus, Wireshark, Metasploit, Hydra, John the Ripper, Zenmap, Kali Linux....
Reconnaissance & Enumeration	Subfinder, Assetfinder, Sublist3r, theHarvester, httpx, WaybackURLs, Nmap, passive reconnaissance, subdomain enumeration, URL/parameter discovery, 403bypass, Legion, Nikto, OWASZAP
Programming & Technologies:	Python, C, C++, Java, JavaScript, HTML, CSS, Bootstrap, MySQL, Flask, React, SQLite
Operating Systems & Environment	Kali Linux, Windows 11, VirtualBox, Linux command line

CYBERSECURITY EXPERIENCE

Cybersecurity Trainee / Intern

NetTech India | June 2026 – Present

- Performing hands-on cybersecurity exercises covering reconnaissance, enumeration, vulnerability identification, web security testing, and security validation.
- Practicing security assessment workflows using tools including Nmap, Subfinder, Assetfinder, httpx, WaybackURLs, Nuclei, Burp Suite, and SQLMap.
- Analyzing web application vulnerabilities and documenting attack methodology, evidence, impact, and remediation recommendations.
- Working with Splunk fundamentals to understand log ingestion, searching, filtering, event analysis, and basic security monitoring workflows.
- Maintaining technical documentation and practical security notes to demonstrate reproducible testing methodology.

Cyber Security Trainee

Tata STRIVE | Dec 2025 – Mar 2026

- Completed structured Cyber Security Analyst training covering network security, ethical hacking fundamentals, vulnerability assessment, and security tools.
- Gained practical exposure to Kali Linux, Nmap, Wireshark, SQLMap, Hydra, and Zenmap through guided security exercises.
- Practiced reconnaissance, network scanning, vulnerability identification, password security testing, and traffic analysis.
- Completed the Cyber Security Analyst Program with an overall Grade A.

Frontend Development Intern

Wappzo Infotech | July 2025

- Developed responsive web interfaces using HTML, CSS, Bootstrap, and JavaScript.
 - Worked with frontend components, page layouts, responsive design, and basic JavaScript functionality.
-

CYBERSECURITY PROJECTS

SQLiShield — SQL Injection Testing Tool

Python | SQLMap | GUI

- Developed a Python-based GUI tool to simplify SQL injection vulnerability testing using SQLMap.
- Integrated SQLMap functionality into a user-friendly workflow for target and parameter testing.
- Documented SQL injection methodology, testing process, evidence collection, and remediation practices.

CyberGuard — SOC Analyst Simulation Dashboard Flask | React | SQLite | Security Monitoring

- Developed a security monitoring dashboard simulating a SOC analyst workflow for security event analysis.
- Built a Flask backend and React frontend with SQLite-based data handling.
- Practiced security-event investigation concepts including alert analysis, event review, and incident-oriented reporting.

SMART-PORT-SCANNER

Python | Flask | Nmap

- Developed a Python/Flask-based port-scanning application for structured network reconnaissance.
- Implemented scanning functionality to identify open ports and support basic network service enumeration.
- Used results to understand exposed services and potential security assessment areas.

Web Security Research & Labs

Burp Suite | PortSwigger | OWASP

- Completed practical web security labs covering [SQL Injection](#), [XSS](#), [Broken Access Control](#), [WebSockets](#), and [HTTP Request Smuggling](#) and many more.
- Used Burp Suite to intercept, modify, replay, and analyze HTTP/WebSocket requests during vulnerability testing.
- Practiced service enumeration for HTTP/HTTPS, FTP, Telnet, SSH, DNS, and other network services, focusing on information gathering and attack-surface identification
- Investigated authentication, authorization, session management, access control, input validation, and business logic weaknesses through hands-on labs.
- Documented vulnerability causes, exploitation methodology, impact, validation evidence, and mitigation techniques.
- Created GitHub documentation for security topics and practical lab work.

EDUCATION

Bachelor of Engineering — Computer Engineering

GIDC Degree Engineering College, Abrama | GTU

2023 – 2026 | CGPA: 8.8/10

Diploma in Computer Engineering

Government Polytechnic Waghai | GTU

2020 – 2023 |CGPA:8.7/10

CERTIFICATIONS & TRAINING

Certification / Training	Key Skills / Learning
Cyber Security Analyst Program – Tata STRIVE	SOC, SIEM, VAPT, Vulnerability Assessment, Penetration Testing, Ethical Hacking, Network Security, Web Application Security, OWASP Top 10, Incident Response, Threat Detection, Security Operations, Cyber Forensics
Cybersecurity Training – NetTech India	CCNA, Ethical Hacking, Web Penetration Testing, Network Security, VAPT, Reconnaissance, Nmap, Burp Suite, OWASP Top 10
Cisco Networking	TCP/IP, OSI Model, IP Addressing, Subnetting, Routing, Switching, DNS, DHCP, Network Troubleshooting
Cisco Cyber Security & Ethical Hacking	Cybersecurity Fundamentals, Ethical Hacking, Network Security, Reconnaissance, Vulnerability Assessment, Security Threats & Attacks
ISC2 Certified in Cybersecurity (CC) – Pursuing	Security Principles, Network Security, Access Controls, Security Operations, Incident Response, Risk Management
SAP Code Unnati – Power BI Advanced Core Analysis	Power BI, Data Analysis, Data Visualization, Dashboards, Data Modeling, DAX, Business Intelligence
